

“FEEDING YOUR CATTLE AND SAVING MONEY”

Saturday, November 16, 2024

1:00 PM

Little Hill Community Center

3044 Attala Rd, 1115

Kosciusko, MS 39090

"Feeding your cattle can be an expensive proposition." You will hear this sentiment being expressed by most cattle producers. The price of feed has skyrocketed over the past five years. Marc Walther of Impact Fusion International will introduce a new breakthrough feed product (SGP+) to cattle farmers in Attala County and the surrounding areas. SGP+ is a renewable feedstock derived from sugarcane waste. SGP+ has been tested and proven to help produce healthy cows, reduce flies, and improve coat health. Marc will distribute samples of the feed with attendees after the completion of the meeting. If you plan to attend this meeting, please get in touch with Todd Cross by Nov 13th to reserve your seat, call 662.417.6018 or email toddlcross@hotmail.com. This will be an eye-opening opportunity for you to learn how to reduce your feed costs and increase profit from the sale of healthy cattle.
