About Us

In creating Supreme Gold Plus (SGP+™), a proprietary formulation using Nutri-Mastic™, Carob, and a biomass forage that is utilized as the cornerstone of our greener, eco-friendly approach to sustainability where innovation and technology bridge herd and home! Our cattle feed, grass and hay replacement, is intricately crafted utilizing this technology to re-instate the natural probiotic equilibrium in your herd yielding overall superior results. Remember, SGP+™ creates a trifecta of healthier and cost-effective rations, improves digestion, and enhances absorption.

When SGP+™ is used as directed, Manure Score 3 Pats become readily noticeable and confirm your herd is receiving 12-15% CP & 62-70% TDN with added mineral balance and mastic to heal the gut.

Supreme Gold Plus Technology

Eco-friendly, Brilliance
Unleashed

Cattle Feed Technology to
Improve Your Yields

Creative Innovation

What sets SGP+™ apart is its alignment with nature's symbiotic interaction that allows for "good bacteria" to fulfill their role and seamlessly transform it into a natural protein source.

Greenest Point

Is more than an innovation for a forage replacement like hay and grass – it represents a commitment to the well-being of your cattle, sustainable farming practices and exceptional results that impact what we consume.

Choose Progress...Choose SGP+™

This distinctive approach promotes the following:

- Healthier rations
- Enhances cost-effectiveness
- Decreases methane gas
- Decrease fly infestations
- Delivering superior results for your herd
- Delivering superior results for both consumption and absorption

Advantages of Using SGP+™

- Improved overall health and wellness
- Enhanced health of progeny and optimized estrous cycles in heifers
- Reduced dependence on high-priced feed stocks and energy-rich junk food
- Decreased quantity of manure and urine with minimized ammonia concentration and methane gas related odor, say goodbye to fly infestations
- Environmentally friendly with a reduced carbon load from respiration and waste elimination
- SGP+™ designed and allows restoration of natural probiotic balance, enhancing digestion and absorption
- Improved heat tolerance and hydration needs
- Notable enhancement in muscle mass and meat quality
- Increased milk production with quality colostrum
- Reduction in antibiotic applications and medications
- Greener environment with less odorous aromas from ammonia in urine, methane gas, less fly infestation resulting in conserved energy for your cattle that allows for maintained or improved hydration status
